

Intercom & entry · door station

SPACE SI-WJZ7 door station

An entrance that knows its residents. Visitors call the flat, residents walk in with their face or a card.

Model: **SI-WJZ7**

Illustrative image, screen switched off.

Real-life example

Anna comes home with her hands full. As she walks up to the stairwell station, the proximity sensor wakes the camera. The station recognises her face and opens the door; a photo held up to the camera will not fool it.

A moment later a guest dials flat 0201 on the screen. Anna sees him on her monitor and lets him in with one touch.

Key functions

Face with liveness check

The dual camera recognises faces and checks that a real person, not a photo, is standing in front of it. The station wakes recognition when someone approaches.

Card, code and call

Residents open with a proximity card or PIN code; visitors dial the flat or the gatehouse on the large portrait screen.

Keeps an eye on the door

The station alerts the gatehouse if the door is left open or someone tries to pry it off the wall, and can take a photo with each opening for the log.

Runs on the building network

Video calls with monitors and the gatehouse console, and door release, run on the building's local network.

Cards and faces managed in SpaceEngine

Residents' cards and faces are enrolled on site or remotely from the SpaceEngine platform.

Flush-mounted

A flush-mounted housing with a CNC-machined aluminium and glass front, operating from -30 to +70 °C.

Specifications

Model	SI-WJZ7
Screen	7" touchscreen, 800 × 1280, portrait
Camera	4 MP, dual-lens, wide dynamic range (WDR)
Entry methods	face (with liveness check), proximity card, PIN code
Connectivity	2 × RJ-45 (Ethernet TCP/IP), RS485, analogue extensions
Sensors	IR proximity, door-contact input, tamper
Front panel	CNC-machined aluminium alloy, glass
Power	12–18 V DC; standby 5 W, operating 10 W
Operating temperature	–30 ... +70 °C
Mounting	flush; cut-out 315 × 120 × 40 mm
Dimensions	330 × 140 × 40 mm
Works with	SI-PJW7 monitors, SI-KR10 console, SpaceEngine platform (cards and faces)
Warranty	12 months. We tailor warranty periods to the client's needs and tender requirements.

Station front view.

Works with the SPACE system

The door station, monitors and console talk over the building's local network. Residents' cards and faces are added and removed remotely from the SpaceEngine platform, in the same system as SPACE locks and terminals.

Ordering

- Price on request: we will quote for your building.
- Device selection, network design, installation and commissioning by SPACE or an authorised installer.
- Before go-live we set unique passwords and the site configuration.
