

Solar PV & BIPV · Pitched roofs

Risen Stacked Super Tile 115 W – Solar Roof Tile

A solar roof tile that looks like a roof tile: horizontal 115 W tiles laid with an overlap, just like conventional roofing.

Product code: **SPC-PV-RIS-STT**

Use case

An investor is building a guesthouse for short-term rentals and wants a roof that looks like ordinary tiles, not panels on racks.

The roof generates power for air conditioning and hot water, and the roof and the power plant are built in a single step.

Price on request — official price list coming soon.

How it works

Looks like a roof

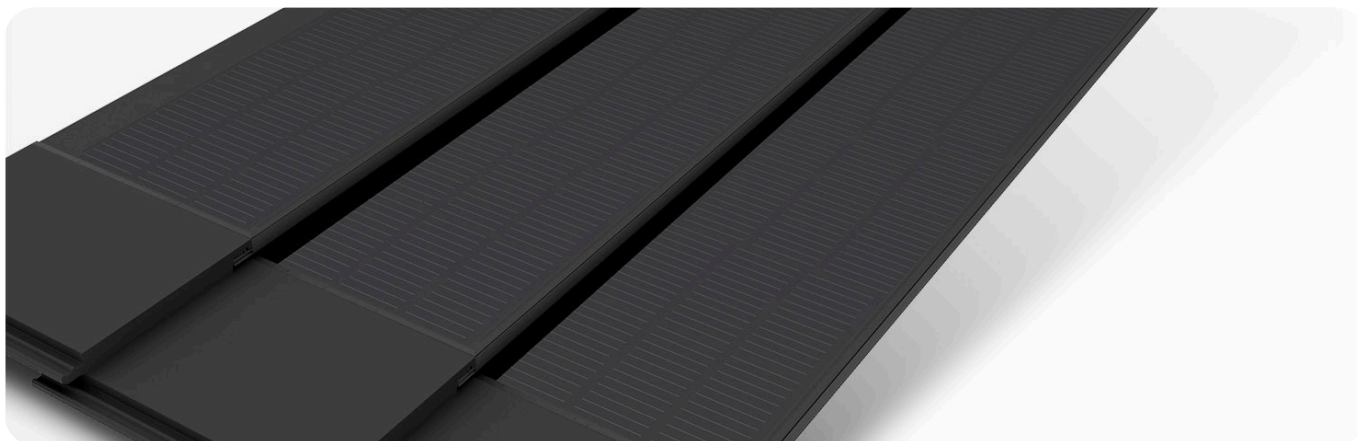

A uniform colour and an overlapping layout, just like traditional roof tiles.

One-person installation

Each 9.6 kg tile is fixed with an upper hook, a lower hook and a screw.

Sheds water and dust

With no frame at the top and bottom edges, rain and dust run off the tile instead of collecting on it.

Specifications

PARAMETER	VALUE
Manufacturer	Risen Energy
Rated power	115 W
Dimensions	1817 × 420 mm
Weight	9.6 kg
Construction	Glass-glass module, waterproof frame
Layout	Horizontal, overlapping
